# Mentors Jewel

The jewel, bears two chisels in saltire, which reminds us that the work of a mentor is both patient and purposeful, whilst pointing out the advantages of knowledge and guidance.

Just as an operative mason would prepare the stone for the hands of the more experienced craftsman. The mentor prepares, guides, supports and enlightens a brother through each step of their Masonic journey.

However, this duty is not yours alone, as we are all mentors to others in freemasonry. So it is highly recommended that you appoint a personal mentor to each brother through the lodge. To ensure that no brother walks alone through his path.

By the exemplary way in which you have conducted yourself this evening, I feel sure that you will find fulfilment in this role and your example will inspire others to do the same
